HTML 5 Assignment

Interactive Resume / Portfolio

Develop an online resume or portfolio using HTML5. This assignment is aimed at ensuring your grasp on structuring web content effectively.

Requirements

1. **Profile Section**
   - Add a profile picture that is optimized for web viewing.
   - Incorporate a short introduction or biography.

2. **Work Experience Timeline**
   - Detail your professional journey in a list format, arranged chronologically.
   - Each entry should provide details about the role, duration, and key responsibilities.

3. **Projects Showcase**
   - List some of the projects you've worked on.
   - For each project, include a visual representation (like an image or video) and a brief description.
   - If you have multimedia content related to some projects, embed them in the appropriate format.

4. **Skills Chart**
   - Use a list format to display your professional skills.
   - For each skill, indicate your proficiency level using a suitable method (e.g., a textual description like "Beginner", "Intermediate", "Expert").

5. **Contact Form**
   - Implement a method for visitors to reach out to you, collecting basic contact information and allowing them to leave a message.
   - Add a feature that provides predefined options for certain fields (e.g., "How did you hear about me?" with options like "LinkedIn", "Friend", "Search Engine").
